

## IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of:

Clyde K. Luttrell

Application number: 10/613,430

Filing date: 07/03/2003

For: CELLEMETRY-OPERATED RAILROAD SWITCH HEATER

Docket no: LUTTRELLPAT1

GAU: 2632

Examiner: Daryl C. Pope

RECEIVED  
CENTRAL FAX CENTER

MAR 10 2005

Entry  
Approved  
D.C.  
11/29/05

SUPPLEMENTAL AMENDMENT UNDER 37 CFR 1.312

## REMARKS

Upon speaking to an Official Draftsperson on this date about the referenced case, it was discovered that the labeling of the second page of Fig.

9a, labeled 9aa, is incorrect, and that these two figures should have been labeled "9a-1" and "9a-2". Accordingly, this amendment is submitted to correct the specification to reflect this drawing change. As this is simply a formal change in the drawings, there should be no need to submit the drawings to the Examiner for approval. The corrected drawings (Figs. 9a-1 and 9a-2, formerly 9a and 9aa) are submitted to the Official Draftsperson under a separate letter.

As this amendment seeks only to correct the specification to reflect a correction of numbering of the drawings, it is respectfully requested it be entered into the case.
